

Instructions to Measure Ring Size Using an Existing Ring:

To determine your ring size, print this page at 100% or full scale. Make sure the “Scale to fit” option is unchecked in the print box. To ensure you have printed this page correctly, use a ruler to measure one off the samples below. They should measure 2 inches or 20 millimeters, respectively.

1. Select a ring that you already own that perfectly fits the finger on which you will wear your A.Jain ring
2. Align your ring with the circle below that mostly closely matches in size. The inner edge of your ring should align with the outer edge of the circle.
3. If your ring appears to be between two sizes, we suggest you opt for the larger size.

Important Note:

Please note that this ring size chart is for reference only. A.Jain cannot be held liable for any error that occur as a result of using this chart.
